BROCE MANUFACTURING COMPANY

BROCE BROOM LIMITED TWELVE-MONTH WARRANTY

For a period of twelve (12) months or 1,000 hours whichever comes first, from the date of delivery of product to the original user, Broce Manufacturing of Dodge City, Kansas warrants each product to be free from manufacturing defects, subject to the limitations contained in this policy. This limited warranty covers parts and labor.

This warranty does not apply to defect caused, in whole or in part, by unreasonable use while in the possession of the user, including, but not limited to, failure to properly set up product, failure to provide reasonable and necessary maintenance, normal wear, routine tune ups or adjustments, improper handling, accidents, operation at speed or load conditions contrary to published specifications, improper or insufficient lubrication, or improper storage. This warranty is not a guarantee that the performance of each product will meet the expectations of the purchaser.

Broce Manufacturing shall not be liable for consequential damage of any kind, including, but not limited to: consequential labor costs or transportation charges in connection with the replacement or repair of defective parts, lost time or expense which may have accrued because of said defects. In no event shall Broce Manufacturing's total liability hereunder exceed the product purchase price.

Many components used by Broce Manufacturing are subject to the warranties of their respective manufacturers. These warranties will be considered void if the product is modified or repaired in any way not expressly authorized, or if closed components are disassembled prior to return. Closed components include, but are not limited to gearboxes, hydraulic pumps, motors, cylinders and actuators.

Our obligation under the warranty is expressly limited, at our option, to the replacement or repair at Broce Manufacturing of Dodge City, KS or at a service facility designated by us. We are not responsible for unauthorized repairs or replacements. Any implied or statutory warranties, including any warranty of merchantability or fitness for a particular purpose, are expressly limited to duration of this written warranty. We make no other express warranty. This warranty cannot be extended, broadened, or changed except in writing by an authorized officer of Broce Manufacturing.

PV380 Display

Tachometer Area: The tachometer is the most important reading and is shown in the largest gauge form that will fit the screen. This represents the Engine speed with an option to choose a 3000, 4000 or 6000 RPM dial

Parameter Area: The following parameters are the electronic engine defaults until other parameters are selected from the menu. Only the second screen, areas 3 through 6 may be changed:

- Engine Oil Pressure (numeric)
- Engine Temperature (numeric)
- Battery Voltage (numeric)
- Fuel Level (numeric)
- 2 – DEF Level (Tier 4 only) or target speed when DPF/SCR is disabled
- Target Speed – appears on screen for 5 seconds when the user throttles the engine

Icon(s)	Function(s)
 	Shutdown (electronic or by mechanical set point) Warning
 	HES Regen Inhibit (Regen Inhibit is restricted when a HES alarm is present)
	Diesel Particulate Filter (DPF)
 	DEF level (electronic only) Service indicator

PREVENTIVE MAINTENANCE BROOM SPECIFICATIONS & SCHEMATICS

Preventative Maintenance

A well maintained A/C system would save on downtime and premature component failures.

Weekly inspections or every 2 days in severe environments should include:

1. Inspect compressor clutch drive belts (tightness, wear).
2. Inspect compressor-mounting brackets (bolts, alignment).
3. Inspect mounting hardware on evaporator unit and condensers.
4. Inspect air intake filter. Clean or replace filter.
5. Inspect evaporator and condenser coils. Clean using air pressure. (DO NOT USE WATER OR PRESSURE WASHERS).
6. Inspect hose and wire harness for proper routing. Leaks and wear.

Helpful Hints

Make sure the evaporator air intake area is not obstructed (i.e. toolboxes, clothing, lunch box, etc.)

Manual thermostats on our systems, when rotated clockwise to the stop position will not allow the A/C compressor clutch to cycle. The compressor will run continuously and the evaporator coil will not defrost. REMEDY: Turn the manual thermostat knob clockwise to the stop position, and then turn the thermostat knob back counter clockwise $\frac{1}{4}$ turn.

Broce thanks you for purchasing our units. It is our endeavor to provide you with a quality A/C unit with trouble free service.

DYNA-PLEX 21C CURSA HYDRAULIC OIL

Dyna-Plex 21C Cursa Hydraulic Oils are high quality; extra-inhibited oils designed with hydrocrack Group II base oils, for use in multi-functional applications where long oil life is required. These oils will give you steady, reliable performance as a hydraulic medium.

Dyna-Plex 21C Cursa Hydraulic Oils have been finely filtered to remove external contamination and contain special O-Ring conditioners to prolong hydraulic component life. Seal swell agents have been added to prevent leaks and Cursa's demulsability characteristics enhance separation and removal of water. These oils will supply 5000 hours of service before extreme oxidation problems occur and also provide excellent resistance to foaming, rust and wear.

DYNA-PLEX 21C EXTENDED DRAIN ANTI-FREEZE/ENGINE COOLANT

Dyna-Plex 21C Extended Drain Anti-Freeze/Engine Coolant is a premium quality ethylene glycol based product. It is pre-diluted to a 50/50 mixture with de-ionized water to provide excellent corrosion control and a deduction of scale buildup. The corrosion inhibitor package eliminates the need for an initial charge of supplemental coolant additive (SCA). The 50/50 dilution with de-ionized water insures high water quality and eliminates the chance for error when mixing anti-freeze with water in the field.

Dyna-Plex 21C Extended Drain Anti-Freeze gives the maximum protection and performance available for heavy-duty diesel applications, while eliminating potential water related problems. Advantages of this product include the highest quality inhibitor package available and its ready to use convenience.

Universal recommends good maintenance practices to monitor inhibitor levels on a regular basis by utilizing coolant analysis, which is an important aspect of extending the life of this coolant/anti-freeze. This product meets or exceeds manufacturer specifications for use in both heavy-duty diesel and automotive applications.
