

Broce Broom

ANGLE BROOM

SKID STEER ATTACHMENT

Our Angle Broom Attachment (BBA) features a 24" diameter brush with standard convoluted poly wafers. This attachment is available in a manual or hydraulic angle broom, angling up to 30° to the right or left. The perfect easy-to-use broom for parking lots, warehouses, roadways and so much more.

Unique Hydraulics

The valving on our attachments provide a constant hydraulic flow and pressure so that the broom rotates at a constant 180 – 200 rpms, prolonging the life of the wafers. This ensures predictable performance regardless of the model of skid steer. Minimum flow is 12 gpm.

PRODUCT FEATURES

- **Multiple Widths**
Available in 48", 60", 72", 84" and 96"
- **Wiring**
