

PICKUP **BROOM**

SKID STEER ATTACHMENT

Our Pickup Broom Attachment (BBA) features a 24" diameter brush with standard convoluted poly wafers.

This attachment deposits dirt and debris inside the bucket making for an easy clean up around parking lots, warehouses, roadways and so much more.

Broce Broom

Unique Hydraulics

The valving on our attachments provide a constant hydraulic flow and pressure so that the broom rotates at a constant 180 – 200 rpms, prolonging the life of the wafers. This ensures predictable performance regardless of the model of skid steer. Minimum flow is 12 gpm.

PRODUCT FEATURES

- **Couplers**

Connect under pressure couplers

- **Heavy-Duty Construction**

Over 3/4" of wear material on bucket

- **Versatility**

Universal Mounting Plate fits most skid steers

- **Multiple Widths**

Available in 60", 72", and 84"

- **Protection**

Front bumper to protect core cover
Pin guards to protect adjustment pins
